

Milton Corsey is Founder and Principal of The Kaizen Group, an organizational and leadership consulting firm headquartered in Cherry Hill, NJ. A skilled educator and business professional with more than 35 years' experience, Milton uses his combined expertise to help companies align the skills and behaviors of their employees with the firms' strategic needs. Specifically, The Kaizen Group clients range from high growth start-ups to Fortune 500 companies across industries, including retail, financial services, manufacturing and healthcare.

Prior to launching The Kaizen Group, Milton co-founded and was managing partner of Straxo where he focused on the development and implementation of customized leadership programs for high potential and emerging leaders. He also expanded the company's services to include coaching senior executives holding positions of Vice President or above.

Milton's entrepreneurial endeavors came on the heels of a 30 year career in education. From 1985 to 1995, he worked in Administration at Rowan College of South Jersey as Director of Purchasing and Dean of Administration. Milton then set his sights on teaching and spent the next 20 years as a professor of business and math at the same institution. Today, he is a professor emeritus at Rowan College of South Jersey.

A graduate of East Carolina University in Greenville, North Carolina, Milton has a Bachelor of Science(B.S.) degree in marketing. He continued his studies and earned a Master of Business Administration (MBA) degree from the Haub School of Business at Saint Joseph's University in Philadelphia, Pennsylvania. Throughout high school and college, Milton was a varsity letterman in football and helped his team become State Champions in 1979. He is a strong community advocate, including his efforts as a board member with the YMCA of Burlington and Camden Counties and former board member with Main Street Woodbury, an all-volunteer, non-profit, urban revitalization organization.

Key to Milton's approach is his belief that when adult learners are properly engaged in a development process designed around their unique needs, human potential is virtually limitless. He goes on to recognize such learning is and needs to be continuous. It is a process without a finite beginning or end. Milton sees his life in the same manner. An avid reader, he is one who will try (and has tried) something once ~ from international food delicacies to piloting a plane and even jumping from one. It is this drive to embrace new experiences that gets Milton up and going each day.

Milton was born and raised in South Jersey, returning back to his roots in Deptford, New Jersey after college. When not working, he enjoys all sports but especially golf as well as finds yoga a valuable method of centering oneself and relaxation. Milton is a proud father and grandfather, with whom he enjoys sharing his quest of learning and love of life.
